

Multimed Inc. is pleased to announce an upcoming supplement to
Peritoneal Dialysis International.

The supplement will include all of the presentations from the pre-congress course on
Experimental Techniques and Models in Peritoneal Dialysis, from the 12th Congress of the ISPD
that was held in Istanbul, Turkey on June 20, 2008.

Additional studies in Experimental PD Models will also be included.

	<p><i>Edited by:</i> Soner Duman and Peter Blake</p>	
	<p><i>Articles that will appear include:</i> Animal models in Peritoneal Dialysis <i>Tao Wang</i></p>	
	<p>How to assess histology in animal PD models <i>Andrzej Breborowicz</i></p>	
	<p>How to assess transport in animals <i>Bengt Rippe</i></p>	
	<p>Technical aspects of experimental peritoneal morphology studies <i>Soner Duman</i></p>	
	<p>Gene vector studies in the peritoneal cavity <i>Peter Margetts</i></p>	
	<p>Apoptosis models in PD <i>Alberto Ortiz</i></p>	
	<p>Experimental encapsulating peritoneal sclerosis models <i>Yasuo Ishii</i></p>	
	<p>TGF beta knockout rat models in experimental peritoneal fibrosis studies <i>Peter Margetts</i></p>	

*Look for this supplement on www.pdconnect.com
which will be published this fall!*
